

PREMIUM EXTERIOR VINYL FINISHES

Durable *Color*

Montecito Series shown in Espresso

Superior energy-efficiency and maintenance-free vinyl, with more color flexibility.

Eight premium exterior colors in addition to white, tan and clay*, means you can coordinate colors with your exterior trim, siding and stucco. All windows and doors with Milgard Premium Exterior Vinyl Finishes have a white interior.

Our premium colors bring out the clean lines and angles of the window frame. Each color suits a neutral look, whether in light and dark variety, and can blend in with the surrounding wall color and create a smooth, contemporary look in your home.

Premium Exterior Vinyl Finishes are available on Tuscany® Series, Montecito® Series windows and doors and Style Line® Series windows.

* Clay not available in California, Arizona, Nevada, Washington, Alaska, or Hawaii.

A Full Lifetime Warranty – Anywhere.

At Milgard, we stand behind every window and patio door we build.

From the deserts of Phoenix to the peaks in Aspen, you can enjoy peace of mind knowing our products are built to last.

Finishes worthy of the Milgard Name

Milgard products are engineered to perform to a higher standard. We developed a two-coat formulation that outperforms the competition. In fact, this formulation is so durable it meets the same color and gloss performance standards as our dependable standard vinyl colors.

Other windows may reflect damaging UV rays, which over time can dull, warp and crack the paint. Milgard Premium Exterior Vinyl Finishes, on the other hand, are translucent. New coating technology allows UV rays to pass through Milgard paint so that the vinyl reflects the UV rays. This preserves the exterior color and finish.

Color screens to match your windows and doors

The screens that come with Milgard windows and patio doors are made of durable aluminum and most* are color-matched exactly to the frame color.

*Bronze screens are a complementary color, Silver screens are grey.

Attractive Grids

Milgard has paid attention to detail by matching the grids to the frame. Whether you choose flat or sculpted grids between the glass or Simulated Divided Lites, the grids are color-matched to the frame on the exterior and are white on the interior.

Grid Colors

| Frame Color | Sand | Fog | Ivory | Silver | Tweed | Classic Brown | Espresso | Bronze |
|------------------------------|------|-----|-------|--------|-------|---------------|----------|--------|
| Grids Between Glass | Sand | NA* | Sand | Silver | Tan | Classic Brown | Espresso | Bronze |
| Simulated Divided Lite (SDL) | Sand | Fog | Ivory | Silver | Tweed | Classic Brown | Espresso | Bronze |

*Fog is only available on SDL grids. Fog Grids Between the Glass styles are not available.

Creating Color That Lasts

Total Solar Reflectivity (TSR) – Simply stated, this is the amount of solar energy that is immediately reflected by a surface material. This measurement is important to ensure reflection of both heat and ultra violet rays, which can be responsible for high surface temperatures and fading of your window finish. Milgard has chosen a performance standard equal to our unpainted, extruded tan product; a product that has been proven time and again in the harsh heat of the desert and intense ultra violet rays of the highest elevations. Milgard finishes were tested for TSR performance against major competitors in its markets. Results showed that Milgard outperformed these competitors by at least 60%*.

Our patented Heat Reflective Technology allows heat to pass through the dark surface, reflecting immediately off the white vinyl base and keeping surface temperatures well below the competition. This technology is the result of extensive research leveraging our partnership with Behr®, a Masco company.

TSR is the measurement of solar energy that is reflected by a surface material. The higher the TSR the better.

* Results based on testing conducted in 2011

**Windows tested had L-values ranging from 31.81 - 34.47.

Tested to the Most Rigorous Standards

Milgard Premium Vinyl Finishes go through regular, rigorous testing to assure long-term durability.

We test for Crosshatch Adhesion, Direct Impact, Humidity Resistance, Cold Crack, Oven Aging and other tests per AAMA 615-13 guidelines. This testing assures you that our Premium Vinyl Finish will stand up to heat, cold, humidity, impact, and weather for years to come.
