Simonton-built windows are AAMA Gold certified, passing the industry's toughest standards delivering durable, weather-resistant and energy-efficient products for your home. Learn more at simonton.com/aama-gold.

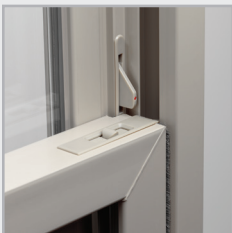

*Coverage varies on options selected.

Tradition Meets Innovation.

Simonton ProFinish Brickmould 300 windows combine low-maintenance beauty with advanced features to help keep your home comfortable, reduce energy costs and resist the elements.

- A Versatile Installation** Unique brickmould design also functions as a J-channel, along with an integrated nail fin allows for proper installation in homes that feature brick, vinyl or both.
- B Strong Construction** The one-piece strength of the fusion-welded frame and sash increase durability and accurate installation.
- C Lasting Beauty** First-generation, durable vinyl is an excellent insulator and resists chipping, flaking and pitting with virtually no maintenance.
- D Weather Resistant** An overlapping, interlocking meeting rail and advanced weatherstripping guards against weather infiltration.
- E Easy Cleaning** The tilt-in/lift-out bottom sash can be easily cleaned from inside the home.
- F Smooth Operation** A 1/2" stainless steel coil spring balance system keeps the sash in perfect alignment.
- G Water Barrier** Sloped sill is angled downward to quickly direct water away from the window.

INCREASED SAFETY

Optional Window Open Control Device (WOCD) self-activating vent latch limits the amount a window can be opened on sliding styles.

CLASSIC STYLING

The multi-tiered brickmould design has a traditional, stepped appearance that complements any home.

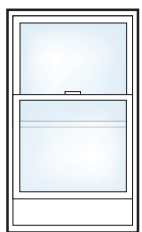

I would recommend these windows.
We love our windows. Easy to clean. Airtight. And look great on the house!

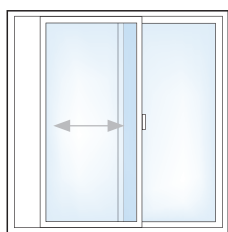

PENNSYLVANIA HOMEOWNER TESTIMONIAL

Style and Design.

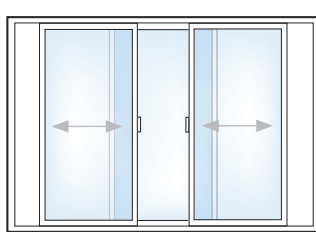

Enhance the architecture of your home with a variety of window styles, colors and grille options. Choose available flat casing and simulated divided lites to highlight the traditional design of Brickmould 300 windows.

Flat Casing

An optional Flat Casing surround simulates the look of a traditional wood window.

Simulated Divided Lites

Applied to the glass to create the look of individual panes of glass.

Between-the-glass Grilles**

Placed between the glass providing a smooth surface for easy cleaning.

**Between-the-glass grilles come in 5/8" Flat, 3/4" Contoured and 1" Contoured sizes.

“

Best windows I've ever had!

I purchased windows for my new construction home! Completely smooth operation and look amazing! Energy efficient too!

”

MARYLAND HOMEOWNER TESTIMONIAL

Energy Performance.

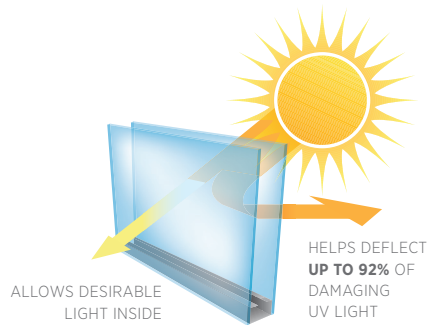

ProFinish® Brickmould 300 windows offer impressive thermal efficiency and interior comfort with a standard 3/4" insulating glass unit, ProSolar® Low-E glass and Argon gas. Available glass options maximize efficiency, strength and privacy.

IN WINTER,
LOW-E GLASS
HELPS RETAIN
WARMED AIR

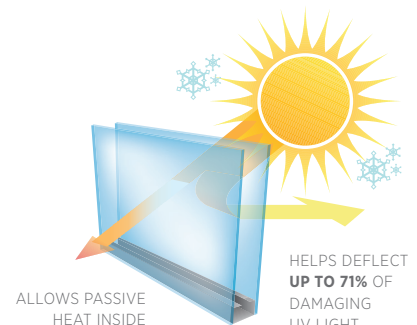

IN SUMMER,
LOW-E GLASS
HELPS DEFLECT
HEAT

ALLOWS DESIRABLE
LIGHT INSIDE

HELPS DEFLECT
UP TO 92% OF
DAMAGING
UV LIGHT

ALLOWS PASSIVE
HEAT INSIDE

HELPS DEFLECT
UP TO 71% OF
DAMAGING
UV LIGHT

ProSolar Low-E Glass

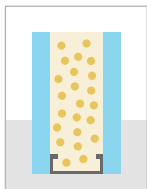

- Standard glass helps keep warmth inside during winter months and deflect the sun's heat and retain cooled air in summer
- Screens out up to 73% of ultraviolet (UV) rays that can cause interior fading

ProSolar Shade Low-E Glass

- Ideal for warmer climates that require help with solar control and interior cooling
- Superior insulating performance

ProSolar Sun Low-E Glass

- Perfect for cooler climates that require more help with heating
- Uses the sun's warmth to increase comfort and reduce heating costs

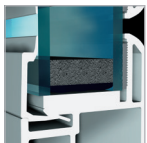

Gas Fill

Standard **Argon** gas, which is six times denser than air, is sealed between the glass panes to increase insulation and reduce energy loss. Twelve times denser than air, optional **Krypton** gas can be chosen for maximum thermal efficiency.

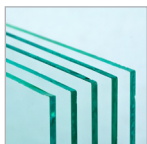

Spacer Systems

The standard Intercept® spacer system has a U-channel design that keeps glass warmer and flexes and contracts for reduced seal failure. The Supercept™ spacer utilizes a stainless-steel alloy that offers increased durability and thermal efficiency.

The non-metallic foam Super Spacer® greatly reduces temperature transfer and saves energy.

Double-strength Glass

Thicker, double-strength glass is break-resistant and offers increased sound control.

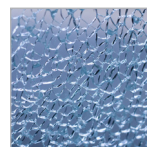

Increased Privacy

Obscure glass has a textured pattern to maximize your privacy while still allowing natural light inside.

Tinted Glass

Help control solar heat gain, reduce glare and visibility into your home with bronze or gray tinted glass.

Safety Glass

Heat-strengthened tempered glass increases safety because it is harder to break through than regular glass and safely breaks into pebbles.

Consult your Simonton representative for available features and options.

Simonton offers regionally specific ENERGY STAR® glass packages designed to deliver optimal energy performance and comfort in any area of the country. According to energystar.gov, ENERGY STAR certified windows can reduce energy bills by an average of 12 percent nationwide.*

*Ranges are based on the average savings among homes in modeled cities. Actual savings will vary based on local climate conditions, utility rates, and individual home characteristics.
