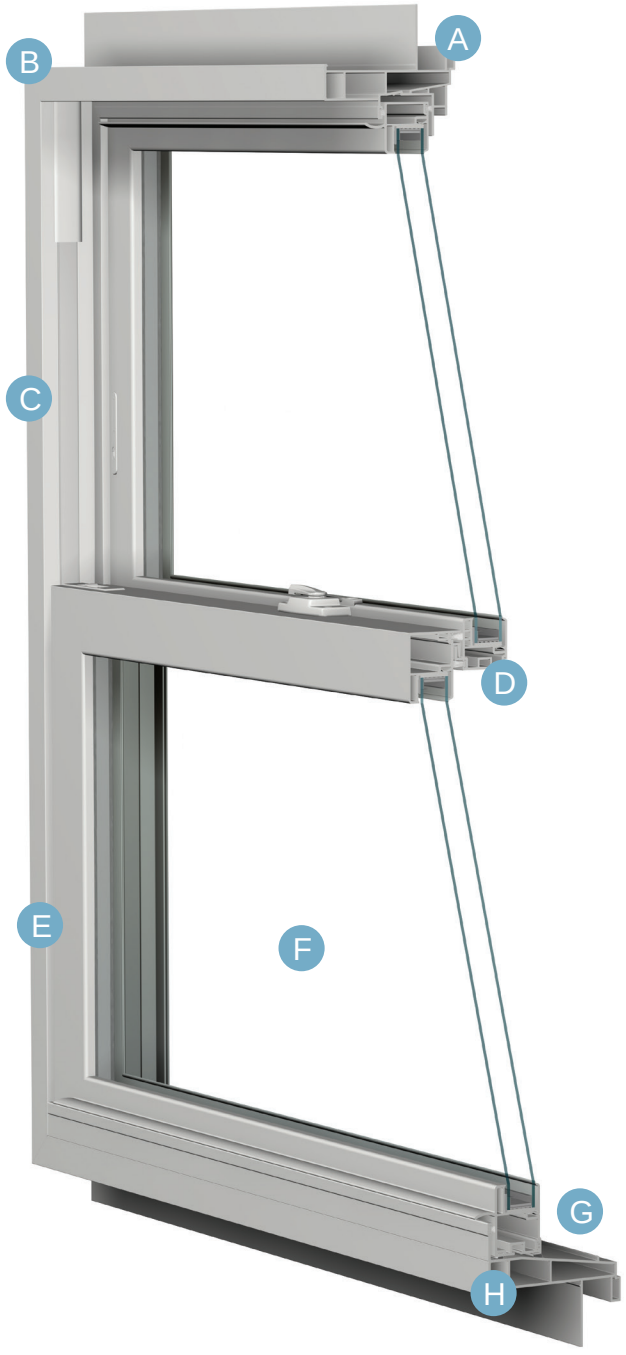
AAMA GOLD

*Coverage varies on options selected.

Tradition Meets Innovation.

ProFinish® Brickmould windows are designed to help protect your home from the elements, provide seasonal comfort and deliver dependable performance year after year.



A **Versatile Installation** Integral brickmould/ J-channel and nail fin makes accurate installation easier and can be used in home projects that feature brick, vinyl or both.

B **Durable Construction** Fusion-welded frame and sash increase strength and weather resistance.

C **Lasting Beauty** First-generation, durable vinyl is an excellent insulator, withstands harsh weather and is virtually maintenance-free.

D **Weather Shield** The overlapping and interlocking sash with advanced weatherstripping protects against wind and rain infiltration.

E **Dependable Performance** The 1/2" coil spring balance system keeps the frame and sash in perfect alignment for reliable operation.

F **Interior Comfort** A 7/8" insulating glass unit with standard ProSolar® Low-E glass and Argon gas delivers impressive energy efficiency.

G **Water Barrier** Sloped sill design quickly directs water away from your home.

H **Effective Insulation** Multiple chambers in the vinyl profile increase thermal efficiency.

SAFETY & SECURITY

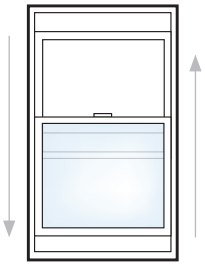
The optional Window Opening Control Device (WOCD) is a self-activating vent latch that limits the extent a window can be opened. It helps increase safety against accidental falls while allowing quick egress in the event of an emergency.

CLASSIC STYLING

The multi-tiered brickmould design has a traditional, stepped appearance that complements any home.

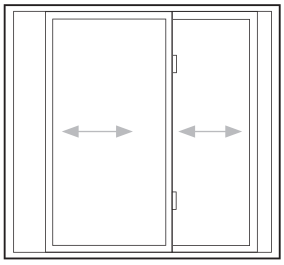
Styles That Inspire.

The ProFinish Brickmould 600 series offers a variety of operating window styles and shapes to complement any architectural design. Discover each style and how it can enhance your home and life.



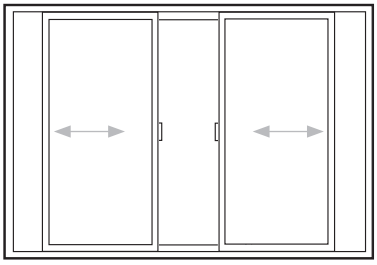
Double Hung

Offering a timeless look, the Double Hung is a classic window choice. Both sash on a Double Hung window slide up and down vertically and tilt in for easy cleaning from inside the home.



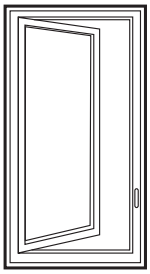
Double Slider

Best suited for horizontal spaces, Slider windows glide from side to side. Both sash open and can lift out for cleaning.



End Vent Slider

3-lite Sliders have a fixed center window with operable end vents. They are perfect for replacing large Picture windows to gain ventilation.

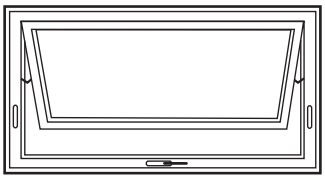


Casement

The Casement features a hinged sash that easily opens outward with a turn of a handle. Casements offer superior energy efficiency, maximum ventilation and when opened fully can be cleaned from the interior of your home.

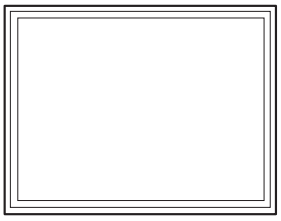
Colonial Casement

With a simulated meeting rail, the Colonial Casement has the appearance of a Double Hung window with all the benefits of a hinged style.



Awning

Hinged at the top, the Awning window opens outward with a simple turn of a crank handle and can provide fresh air even when it's raining.



Picture

With an expansive, unhindered view, a Picture window is fixed with no moveable sash which enhances weather resistance. They are ideal for large or small areas where daylight is desired.

MY HOUSE

Simonton's My House is your online window and door idea book! Use Simonton.com to gather the images of the window and door styles, color, hardware and grille options that inspire you.

> Great windows!
>
> Really love the craftsmanship and how easy they are to use especially for cleaning.

PENNSYLVANIA HOMEOWNER TESTIMONIAL

Make an impression.

Combine ProFinish Brickmould 600 window styles to create unique configurations. Consider multiple windows for more natural light, geometric shapes to add architectural character or a wall of windows that bring the outside in.
